DIRECTOR NEWS

Welcome to the March edition of our Newsletter which comes at a time where the Coronavirus's impact is being felt around the world and as we consider what this may look like for us in our local context.

We ask that you take the time to read page 5 of this newsletter as we outline what actions we may take in the event where we may be forced to close and the impact this will have on families and our staff. We will continue to keep you updated with the latest information from the Government as we receive it by both email and updates on our Facebook page.

We also ask that you support us in trying to keep infection at a minimum by keeping your child home if they are unwell including runny noses and sniffles and by sanitising both you and your child's hands when you enter and exit the centre. The Health and Safety section of this newsletter provides some great tips on how you can further explain hygienic practices with younger children.

As far as learning and development of the children is concerned, the teachers and educators are powering forward in achieving set goals for the rooms. Please take time to view and contribute to the programs and celebrate our success with you.

Please remember our doors are open all the time, so please come for a chat as your feedback support our best practice.

Have a great March!
Fortunate Mapuvire - Director

NATIONAL RIDE '2' SCHOOL DAY – MARCH 13

National Ride2School Day is held around Australia in March every year. It provides an opportunity for students, parents and teachers to try riding, walking, skating or scooting to school as well as celebrating the regular walkers and riders.

Join more than 350,000 students across the nation who will ride, walk, scoot and skate to school on Friday **Find out more at www.bicyclenetwork.com.au**

INTERNATIONAL DAY OF HAPPINESS – MARCH 20

"...International Day of Happiness is more than just a fun celebration; it also reminds us all that the world is a better place when we connect with and care about the people around us"— Dr Mark Williamson. This year's theme is **Happier Together**, focusing on what we have in common, rather than what divides us. **Find out more at worldwetlandsday.org** www.dayofhappiness.net

CREAMY CARBONARA WITH PEAS & BASIL

PREP 15 min | COOK 15 MINS | SERVES 6

INGREDIENTS

- 6 slices prosciutto
- 500 grams short pasta
- 1 cup peas
- 250 ml cream
- 2 eggs plus 2 egg yolks
- 3/4 cup parmesan, grated
- 1 cup basil leaves, torn

METHOD:

1. Preheat oven to 180 degrees Celsius (350 F). Place prosciutto on an oven tray lined with baking paper and bake for 5 minutes or until the prosciutto is golden and crisp. Roughly chop and set aside.
2. Meanwhile, bring a large pot of salted water to the boil. Add pasta and cook for a couple of minutes. Add peas and cook until the pasta is al-dente and peas are tender. Drain and set aside.
3. In a small jug place the cream, eggs, egg yolks and parmesan and whisk to combine.
4. To assemble: place the pasta, peas, prosciutto, basil and creamy sauce in a large bowl and mix to combine. Serve with a little extra grated parmesan and a few extra torn basil leaves.

30 MINUTES – GOAL PLANNER

VLADIMIR LYSEEV

What if you spent 30 minutes a day on your big goal, or dream? What could you achieve in a week, a month, or a year if you consistently completed small tasks? Set the amount of days for each goal, decide on the time and view detailed statistics on each goal as you work on them.

stickK: GOALS & ACCOUNTABILITY

STICKK.COM, LLC

No matter what your goal is - meditate, learn a language, lose weight, quit smoking or drinking, watch less TV, exercise more often... stickK can motivate and help you achieve it! Created by a Behavioural Economist and a Law Professor from Yale University, stickK is a goal-setting platform, habit tracker and online community of goal-setters.

STRIDES: HABIT TRACKER

GOALS LLC

Track all your Goals & Habits in one flexible free app. With Strides you can track anything - good or bad habits and SMART goals - with reminders to hold you accountable and charts to keep you motivated.

Recommended in The New York Times, Strides has been called "the most comprehensive, user-friendly, beautifully designed goal tracking app available." Imagine having all of your most important habits, routines and goals together in one simple to do list. Now you can. :)

FOCUS: 9 phrases that help little kids express big emotions

When your kid is in full Ron Burgundy-style "I'm in a glass case of emotion" mode, it's easy to match their level of anxiety—thanks to the crying, the screaming, the jumble of words made unintelligible *because of the crying and screaming*...

"For a lot of parents, when they see the meltdown, it's easy for them to notice the behaviour: the falling out, the crying, the emotion," says Brandy Wells, licensed independent social worker specializing in childhood mental health and the creator of My Motherhood Magic. "But usually underneath all of that is a need that needs to be met." Being in tune with your child's needs requires a lot of patience and communication. Yet in an attempt to calm your child as quickly as possible, you might focus on the behaviour, and not whatever's causing it.

"Parents ask their children: What's wrong with you?" says Jacob Kountz, a family therapist in Bakersfield, California. "A more helpful question would be: 'Help me understand what happened.' This type of curious language primes children that they aren't being accused of something, it stays away from unhelpful language such as *wrong*, and it allows children to share their thoughts and feelings."

Raising thoughtful and emotionally intelligent children starts with teaching them how to share their thoughts and feelings.

The following phrases can help you teach your kids how to express themselves—and help prevent meltdowns.

1. "I can see that you are upset. You are allowed to feel that way. I'm here when you're ready to talk."

Why it works: Letting your child know that you see them—that it's okay to have feelings and that you're there for them—helps them feel safe. And having that safety gets them out of melting down and into communicating.

2. "I would feel [insert emotion] if that happened to me, too."

Why it works: "When kids know that someone isn't going to tell them to feel differently or that their feelings are wrong, they'll seek out that kind of comfort more often," Kudla explains.

3. "I see that you had a hard time with [x], what can we do to make it easier next time?"

Why it works: Encouraging kids to come up with their own strategies for dealing with frustration is part of a strategy that social worker and mom of three Brandy Wells calls FLIP IT: Identify the feeling (that's the F), then if needed, set an appropriate limit for how to express the feeling (for example, "it's okay to cry, but we don't hit"). I - stands for inquiry, encouraging kids to come up with solutions and strategies of their own. "And then P is prompting—helping them problem-solve," Wells explains. "You want them to practice asking, 'What do I need to do?' And if they're not able to do that, then you are able to give them that assistance."

4. "Your words help me understand you better."

Why it works: Pope's daughter knows she has the power to make herself heard and understood through her words. Imagine teaching that powerful, empowering lesson to your kiddo!

5. "It seems like you're having a hard time finding the words to explain what you're feeling. Is there another way that you can show me what's going on?"

Why it works: Kids don't always have to "use their words" to be understood, and listening isn't the only tool parents have to understand their children's needs. "Creative expression has been an incredible tool for us," says Sterling.

6. "I'm your mother, but I don't live in your body. What does it feel like? What's your brain feeling?"

Why it works: This phrase can help teach your children about the mind and body connection and can also help you as a parent to separate the behaviour from the child—they're not *being bad*, they're trying to communicate about what *feels bad*.

7. "What colour are you right now?"

Why it works: "Children begin to make the mind-body connection, as well as learn appropriate coping skills," Rollo says.

8. "Let's take a deep breath. Look in the mirror, wipe your face and straighten your clothes."

Why it works: This phrase is like a reset button for kids, teaching them how to centre themselves and move past the meltdown. Deep breathing is a coping mechanism that works across all age groups—taking a deep breath in and a long exhale helps with getting grounded. A sweet way to teach your child how to do this is by saying, "Smell the flowers, blow out the candles."

9. "I'm going to go fishing...tell me if I caught anything!"

Why it works: "Eventually parents 'catch' the right feeling their child has," Chansky says, "or sometimes, just having the conversation helps kids figure out what they need. At the very least they appreciate your efforts at valuing their feelings and trying to help them express them."

None of these phrases and strategies are one-time fixes, but they can all be part of an ongoing conversation between you and your kids. Give your kids the space to provide answers and solutions themselves, and they'll grow to understand how to express their feelings and emotions—even the tough ones.

Akitunde, Anthonia (2020, February 15). 9 phrases that help little kids express big emotions *Retrieved from* www.mother.ly/child/phrases-that-prevent-tantrums

Number Walk

Supplies: pen and paper. The next time you go out, ask your child to spot as many numbers as they can. Write the numbers down as they see them or ask them to try writing them. Even if they aren't yet able to write clear numerals, the act of ascribing a mark for each number is an important stage in early writing. When you get home, have a look at all of the numbers you have collected. Ask your child to find a group of objects to represent the different numbers.

HEALTH & SAFETY: Germs for Kids: Making It Fun, Making It Real, Making It Stick

The concept of germs, for kids, is very abstract. Explaining hygienic concepts to children in an easy-to-understand way can be key to keeping them healthy.

How do you explain the concept of germs for kids to understand? Should you just focus on the actions behind hygiene -- washing your hands, catching your sneeze with your elbow, and not sharing utensils or food -- without dwelling on the explanations? According to health experts, giving kids explanations behind these basic hygiene practices can go a long way towards helping them become more germ-conscious.

Know the Nuts and Bolts of Germ Education

Even young children can understand the basic concept of germs, according to Dr. Dina Kulik, a paediatric emergency medicine specialist and assistant professor at the University of Toronto's Department of Paediatrics. She describes germs as tiny "bugs" that live on all things and explains to kids that sometimes these bugs can make you sick. When you're sick, you miss out on having fun, going to school and going to friends' homes. You can explain to older kids that these germs are called bacteria, she advises, and they're so small they can only be seen with a microscope. While they're not actually insects, they are living organisms that can grow and multiply quickly.

Dr. Danelle Fisher, vice chair of paediatrics at Providence Saint John's Health Centre, agrees on the importance of teaching even very young children about germs. In her opinion, it's important to explain to kids, as they get older, that some germs are good -- for example, probiotics -- and that others are bad, such as cold viruses. When they get even older, you can explain the difference between viruses and bacteria to them, so they understand why antibiotics can help with some illnesses, but not others.

Point out several examples of ways that your child can avoid becoming sick from germs, such as coughing into her sleeve or washing her hands after blowing her nose. And there's one important step of teaching about germs for kids that many parents miss: having your child repeat back to you what you said, so that you know that she understands it. Dr. Fisher believes that this step can help you clear up any misunderstandings before they take root.

Having a hard time figuring out how to explain such an abstract concept to your child? Consider using outside sources. "As paediatricians, we're always happy to help parents explain complex ideas to their children," says Dr. Fisher. If parents aren't sure what to say, they can ask their paediatrician for advice, or even ask their paediatrician to broach the topic with the child.

Play Germ Games and Activities

Glitter Germs Sprinkle a little glitter on your child's hands in this activity from the Columbus Public Health website. Have him wash with just water. Repeat the experiment, washing with soap and water the second time. Have your child observe which method removes more glitter. Then put glitter on your hand and touch your child's shoulder, hands and hair. Have him see how the glitter (germs) can spread by touch.

Everything You Touch Also from Columbus Public Health, this activity has children make and colour their own germs and then tape them to anything they touch to see how widely germs spread by touch.

Watch Out for Hygiene Overkill

While it's important to teach our kids about basic hygiene, some kids are prone to going overboard. In general, parents should have a relaxed, matter-of-fact attitude towards germs and cleanliness -- while washing your hands after using the bathroom should be sacrosanct, keeping your hands completely clean at all times is not only unreasonable, it also may be unhealthy. Dr. Kulik believes that the way you introduce germs for kids can affect whether they become overzealous about hygiene. "I try not to instil fear, as this can lead to over-washing," she says. "If kids think of them as cute little things, like a cartoon, they can understand we need to stay clear of them, but not be fearful." In addition, if your child seems to be obsessing a bit over hygiene, make sure that you're modelling normal germ control and not going overboard yourself.

AUSTRALIAN FORESTS

Australia has 134 million hectares of forest, which is 17% of Australia's land area. This is about 3% of the world's forest area, and the seventh-largest reported forest area worldwide. Visiting and admiring your local forests is one of the best ways to ensure these incredible resources are cared for! When was the last time you visited a local forest, for a bush walk or a picnic? A quick google search will lead you to your local forest. forestrycorporation.com.au allows you to easily find forests and associated activities in NSW.

CORONAVIRUS: What are the possible impacts for GRELC?

With the impact the Coronavirus is currently having on a global scale, and with the Australian Government closely monitoring this and potential impact of a major outbreak here in Australia Ranges is currently reviewing both the current hygiene practices to assist in minimising the risk of infection at the centre along with what impact a forced closure of the centre would mean.

Increased Hygiene Practices

From 3 March 2020 we will be asking families to sanitise their own hands and their child's hands when then enter and exit the centre. There will be sanitising hand gel at the sign in desks for this purpose and for those families at the ELC we ask that you ensure the gel is placed on the whiteboard ledge so the children are not able to access it.

The centre staff are ensuring toys and surfaces are being cleaned regularly and ask for families to keep their child at home if they are unwell.

Feature Article

Planning for Action where Government Mandates School and Long Day Care Closures

At this point in time we have not been advised of plans and implications from Government should the worse case scenario's arise where they require our Centre to close to help limit the spread of the Coronavirus. From what we know from situations like the impact of Bushfires, we believe we can expect similar response that delivers some government financial support across the community.

In the case of our business we expect this support will predominantly come through declaration of a "Local Emergency" and through this continued payment of the Child Care Subsidy including access to Additional Child Care Subsidy (ACCS) – Temporary Financial Hardship, for families where they face loss of income through potential Stand Down from their employment.

Under this expectation it would enable our business to importantly continue to gain reduced income in the period and be in a position to continue to at least pay staff a minimum wage during a stand down, continue to meet our fixed cost obligations, and thereby be ready to commence again for all Families as soon as the closure is lifted.

For our Families it would mean we approach the closure in the same manner as a Catastrophic Fire Day with the Centre Closed for all, however our charges would be limited to our reduced Holding Fee price to maintain places for a return when the closure is lifted.

Please contact Fortunate directly to discuss concerns you may have in this space.

FREE PLAY, FREE-CHOICE PLAY, CHILD-DIRECTED PLAY OR UNSTRUCTURED PLAY

The importance of Free Play has been well researched. It is essential for all children to participate in Free Play. From their Early Years and throughout the Key Stages it plays a crucial role in their development.

What is FREE PLAY: *Children choosing what they want to do, how they want to do it and when to stop and try something else. Free play has no external goals set by adults and has no adult imposed curriculum. Although adults usually provide the space and resources for free play and might be involved, the child takes the lead and the adults respond to cues from the child*”.

children are highly motivated to play! They want to know about the world around them, and they need to be in a caring environment that allows them to explore all sorts of concepts freely, whether academic or social. Most aspects of physical and cognitive development and learning come through play. Given plenty of time for Free Play, a child’s way of playing will grow in its complexity. This is what we love about it!

FREE PLAY...

- Promotes Personal, Social and Emotional Development
- Encourages Cognitive Development and a Child’s Ability to Solve Problems
- Supports a Child’s Physical Development
- Enhances a Child’s Language and Understanding of Cultures
- Reinforces Classroom Learning
- Allows a Child to be Happy

National Quality Framework | Quality Area 1:
Educational Program and Practice

Element 1.2.2 - Responsive teaching and scaffolding
Element 1.2.3 - Child directed learning

Homan, Emma. (2020, February 15). Why Free Play Is Crucial For Early Years Children. Retrieved from <https://www.pentagonplay.co.uk/news-and-info/why-free-play-is-crucial-for-early-years-children>

IN HOME CARE UPDATE

Since the beginning of 2020 we have been providing In Home Care services to a small group of families where we are assisting them to work while their children are cared for by one of In Home Care Educators in their home. Our families have diverse situations such as shift work or children with medical needs that does not allow them to attend a regular long day care centre.

Our Educators are delivering a program for these children in line with their learning and developmental needs and are forming strong trusting relationships with not only the children but their families as well.

As we move further into the year we are continuing to receive enquires from families all across Adelaide that are eligible to have an Educator meet their needs.

This is an exciting time for us as we move to into this new care delivery model and would like to thank the families who have trusted us with the care for their children.

If you would like any further information regarding the In Home Care program or the eligibility requirements, please contact Fortunate by either phone or email.

The Floor Is Lava

Short simple activities to get some active minutes in the day.

This is a simple game often lots of fun when surprised on those you intend to play with. Before you do play though, make sure the area you intend to play it in is free from breakables.

To play, one person yells “The floor is lava!” and then starts counting down from five. Every other person must be completely off the ground by the time the counter reaches zero. What, they climb on is up to them, but if any part of them remains on the ground, then they’ll be burnt to a crisp.

Continue the challenge by asking players to reach a certain place without touching the ground. Watch as each player creatively devises a plan for crossing the dangerous lava without burning their toes.
